AUTHOR INDEX

Aklonis, J. J., 71
Bagley, E. B., 177
Bixler, L. L., Jr., 165
Cayrol, B., 129
Cirlin, E. H., 79 and 101
Collins, E. A., 235
Davidson, J. A., 235
Drandell, M., 23
Eisenberg, A., 129
Fesko, D. G., 51
Finger, F. L., 177
Gandhi, K. S., 211
Goetze, K. P., 189
Haller, H. S., 235
Hunston, D. L., 201
Jamieson, R. T., 23
Kaelble, D. H., 79 and 101
Kwei, K. T., 165
MacKnight, W. J., 117
Mendelson, R. A., 177
Moacanin, J., 71
Myers, R. R., 3
Porter, R. S., 189
Shen, M., 23
Shida, M., 153
Shroff, R. N., 153
Smith, T. L., 39
Tetreault, R. J., 117
Tschoegal, N. W., 51
Williams, M. C., 211

SUBJECT INDEX

Additive Compliance model, 62
Apparent heat of polymerization, 82, 108
Attenuated reflection of pulses, 17

Boltzmann Superposition Principle, 71
Box relaxation spectrum, 43
Boyle's Law, 167

Cavitation, 7, 79
Chain scission, 71
Charle's Law, 167
Chemo-rheology, 79, 101
Cinematography, 7
Crosslinking, 71

Deborah number, 4
Delay lines, 201
Die Swell, 177
Differential scanning calorimetry, 80, 101
Dissolved gases, 165
Distribution of relaxation times, 24
Distribution of retardation times, 24
Doolittle equation, 171
Dynamic mechanical properties, 118, 135

Elastically effective chains, 71
Epoxy-phenolic adhesives, 79
Ethylene-vinyl acetate polymer, 117
Extrusion degradation, 189

Film formation, 3
Flow ultramicroscopy, 235

Gel permeation chromatography, 120, 191
Guth-Smallwood relation, 90

Instron, 87, 102
Instron Rheometer, 181, 190

Kraton, 51

Latex particle analysis, 235
Laplae transform, 41
Linear Programming, 23
Lorentz-Mie Theory, 239

Maxwell equation, 10
Maxwell model, 24

Osmotic pressure, 211

Polybutadiene, 52
Polyethylene, 165, 177
Polyimide, 101
Polyisobutylene, 28, 40
Poly (methyl methacrylate), 215
Poly (phenylene ethers), 129
Polystyrene, 52, 189, 215, 241
Powerlaw, 213

Relaxation spectrum, 24, 40, 153
Retardation spectrum, 24, 40
Rubber elasticity, 88, 180

Shear degradation, 192
Stefan equation, 5
Stress relaxation, 133, 144
Structural adhesives, 79, 101
Superposition model, 58

Thermomechanical analysis, 80, 101
Thermoheologically complex materials, 51
Thermorheologically simple materials, 52
Thermosetting adhesive, 79
Time temperature superposition, 51
Torsional braid analysis, 14, 97
Two phase polymeric materials, 51

Vibron, 120
Viscoelastic functions, 23, 39
Viscoelastic properties, 71, 129, 201
Viscoelastic spectrum, 12
Viscoelastic splitting, 7
Viscosity, 153, 211
Viscous splitting, 4
Voigt model, 10, 24

Wedge relaxation spectrum, 43
Weissenberg Rheogoniometer, 154, 215
WLF equation, 52

X-ray diffractometer, 120
